HVLP Connectors

The HVLP motor controllers use TE high power connector systems and Molex 48 way low power I/O connectors as detailed in the matrix on this sheet (standardised across the HVLP range).

Lead times on these connector kits is 12 weeks, so please ensure adequate time is allowed for delivery.

Note: The I/O connector pin-out will be changing to match the GEN5 product family during the Beta release. Please make your customers aware...

The minimum sale price of these connector solutions is shown below.
As volume increases and the supply base changes to a low cost region these prices will reduce.
Note: All assembled harnesses come with 4m long tails (open end).
